### Online Online resources to help you manage your unique risks

#### Website Library:

Instant access to products and services that can help businesses manage their unique risks.

#### Industry resources:

Specific safety and loss prevention resources organised by industry. Our industry resources include bulletins, guides, and links to other credible safety websites and resources.

- **Topic resources:** Access to resources organised into several safety libraries, including health and safety, driver and fleet safety, property and facilities, and product safety.
- **Training resources:** Webinar replays and “supervisor talks,” that can be used to help educate employees on various safety topics. A wide range of computer based training available from a strategic partner.
- **Disaster planning:** Implementing an effective emergency preparedness plan can save lives, reduce property damage and minimise interruption to business operations. Our resources can help customers be ready when a disaster or serious incident strikes.

### On-Demand Risk expertise delivered when you need it

#### Risk Control On-Demand™

##### Consultation:

Responsive remote consulting using screen-share technology to share videos, photos or other media with a consultant.

- Access to specialist expertise
- Supports consulting to a geographically dispersed group
- Consultation around a wide range of exposures including manual and material handling; ergonomics; slip, trip and fall hazards; occupational road risk and business continuity planning.

#### Strategic Relationships – Alliances

We have a number of alliances with providers of risk management services, including fire, security and safety related products and services.

Log in to our Risk Control customer website and visit the “Services” section to see details of our alliance partners.
